

# GAZA

## WE MUST END GENOCIDE IN GAZA

Palestinians in Gaza are **facing mass starvation**. The Israeli military is blocking aid, bombing shelters, and turning food, water, and medicine into weapons of war.

Meanwhile, the U.S. continues to send billions in weapons to the Israeli government — despite clear evidence they’re being used to commit war crimes.

Amnesty has repeatedly documented U.S.-made weapons in unlawful attacks on civilians. **U.S. leaders risk complicity in genocide.**

**Act now:** Tell Congress to stop arming this crisis, demand a permanent ceasefire, and help facilitate the unhindered entry and distribution of humanitarian aid to Gaza.
